

ATS Resume Report

```
{
  "ats_score": 55,
  "candidate_status": "Partial Fit",
  "strengths": [
    "Strong Java and Object-Oriented Programming (OOP) foundation.",
    "Excellent Data Structures & Algorithms (DSA) skills, demonstrated by 200+ LeetCode problems.",
    "Proficiency in SQL and DBMS concepts.",
    "Good understanding of core computer science subjects (Operating Systems, Computer Networks).",
    "Experience with version control systems (Git, GitHub).",
    "Developed a full-stack project using Java and React.",
    "Strong academic record (CGPA 8.6/10) and problem-solving abilities.",
    "Bachelor's degree in Computer Science (AIML specialization)."
  ],
  "weaknesses": [
    "Lack of explicit experience with Spring Boot, a fundamental framework for Java backend development.",
    "No clear demonstration of building REST APIs, which is crucial for the role.",
    "Missing specific mention of Java Collections Framework and Java 8 features (Streams, Lambda).",
    "No dedicated backend-only project shown; existing projects are either full-stack (without Spring Boot mentioned) or frontend.",
    "Lack of exposure to preferred skills like Docker, Kubernetes, Cloud platforms, CI/CD, message brokers, or caching technologies.",
    "Basic knowledge of Linux and command-line tools is not explicitly mentioned."
  ],
  "missing_skills": [
    "Collections Framework (Java)",
    "Java 8 Streams, Lambda, Optional",
    "Basic Spring Boot",
    "REST APIs (explicit understanding/experience)",
    "One dedicated backend project (as per the job description's project requirement)",
    "Linux and command-line tools"
  ],
  "recommendation": "The candidate possesses a strong foundation in core computer science, Java, and DSA, making them a promising fresher. To significantly improve their candidacy for a Java Backend Developer role, they must gain hands-on experience and explicitly highlight Spring Boot proficiency, ideally through a dedicated backend project focusing on REST API development. Mentioning Java Collections and Java 8 features would also strengthen their profile. Exploring basic Linux commands and some preferred technologies would further enhance their appeal."
